General Guidelines on How To Make A Home Video:

- 1) Use VHS, DV, MiniDV, DVD or BETACAM ONLY
- 2) If you use a microphone, make sure you are close enough to it to get good sound quality and be sure that there is no distracting background noise - turn off TVs, radios, etc.
- 3) Be sure you are shooting in a well-lit place with no shadows. Light on your face is the most important thing!
- 4) Get close-ups as well as full-length shots of yourself - we want to see your smiling face!
- 5) Watch your video before turning it in to check the image, **sound** & lighting quality
